- ◆ Violation of Permit Terms or Basin Plan Prohibitions **Minimum amount is the economic savings of the violation**

Current Regulatory Atmosphere

- “The Learning Curve is Over”

Causes of Erosion

Definition of Erosion

- ◆ Soil erosion is the **process** by which soil particles become detached by water, wind, or gravity and are transported from their original location.

Types of Erosion

- Splash Erosion
- Sheet Erosion (Overland Flow)
- Rill Erosion
- Gully Erosion
- Channel Erosion

 - ◆ Preventing further impairment, from storm water discharge, of 303(d) listed water bodies for sedimentation/siltation or turbidity.
 - ◆ Preventing other non-visible pollutants from causing or contributing to exceedances of water quality objectives.
- ◆ The Modification is Now included in the “02” Permit
